

# Testing for HIV, hepatitis B and hepatitis C

Everyone aged 16 and older who has their blood tested in a London Emergency Department (A&E) now has it tested for HIV, hepatitis B and hepatitis C.

It's important to get diagnosed early as treatment is life-saving and free from the NHS. It will help you stay well, and also help stop the viruses being passed on.

If you do not wish to be tested, please let a member of staff know.

**Your results are confidential.**
